

Sterilization Monitoring and Assurance Leaders Unite; Crosstex Acquires SPSmedical

Hauppauge, New York – November 1, 2012 – Crosstex International, a subsidiary of Cantel Medical Corp. (NYSE: CMN) announces the acquisition of SPSmedical – a move that unites two of the leading North American providers of sterilization monitoring services and sterility assurance products in dental, acute-care, alternate-care and office based practitioner markets.

The addition of SPSmedical to the Crosstex family strengthens the Crosstex position in the acute-care and alternate-care markets while broadening the Crosstex sterility assurance product offering. Based in Rochester, NY, SPS is a leading manufacturer and provider of biological and chemical indicators for sterility assurance monitoring services and products. SPS offers a wide-array of products and services that enable hospitals, surgi-centers, office-based practitioners and dental offices to safely and accurately monitor and verify their sterilization practices and protocols.

In addition to the acquisition, Charles Hughes, the General Manager of SPSmedical has been appointed to the position of Vice President of Infection Prevention Consulting Services at Cantel. Hughes commented, “We see great opportunity to continue the growth of SPSmedical, and Cantel is the perfect partner to help us achieve those goals. SPSmedical, Crosstex and Cantel all share the same commitment to providing high quality products and services for infection prevention and control. I am incredibly proud of the accomplishments of our company, and I am thankful to the entire SPSmedical team. We are very excited to bring this business to the next level in our partnership with Cantel and Crosstex.”

According to Gary Steinberg, President & CEO of Crosstex, “SPSmedical is the perfect complement to our ConForm brand biologic monitoring business and will provide us with the platform to broaden our reach into the acute-care and alternate-care markets. SPS’ strong leadership in defining and establishing sterility assurance standards in healthcare settings is a strong platform upon which Crosstex can expand its global presence as a leader in the healthcare infection prevention and control market.”

“The addition of SPS to the Crosstex family expands our presence in the acute-care and alternate-care markets, broadens our product portfolio and strengthens our position in the dental market,” said Andrew Whitehead, Senior Vice President of Business Development. “Utilizing the strengths, reputations and talent of the combined Crosstex and SPS teams, we will increase our market penetration into all healthcare channels, both domestically and internationally.”

About Crosstex International, Inc.

A division of Cantel Medical Corp., Crosstex manufactures a wide array of infection prevention and control products for the healthcare industry.
